EDUCATION

University of Illinois at Urbana-Champaign

Expected Graduation: May 2028

- Bachelor of Science in Computer Science + Statistics (GPA: 4.0), Minor in Data Science
- Main Courses: Algorithms & Models of Computation, Data Structure, Computer System, Data Science Pipeline

TECHNICAL PROJECTS & INTERNSHIP EXPERIENCE

National Center for Supercomputing Applications (NCSA)

Champaign, Illinois

Guinea Pig Simulator 2.0 - Simulation Software Engineering Project

SPIN Intern April 2026 ~ Present

- Designed a modular guinea pig inheritance simulator to model genotype-to-phenotype mapping, mutation effects, and multi-generation trait propagation.
- Developed configurable simulation components for breeding logic, mutation type/rate control, Markov-based state transitions, and phenotype outcome generation.
- Built data-processing workflows to aggregate simulated offspring outcomes into population-level phenotype distributions, trend summaries, and visualizable datasets.
- Designed Python-based visualization workflows to help users explore inheritance patterns, mutation effects, and trait frequency changes across generations.

IDX Exchange

Boise, Idaho

Full-Stack Development Project - Property Search Website

Software Engineer Intern October 2025 ~ December 2025

<https://chuck.calisearch.org/>

- Developed and tested interactive front-end search and filtering features using modern JavaScript, modular components, and responsive UI patterns.
- Built backend routes and PHP API endpoints to support geolocation search, advanced filtering, and dynamic map-based queries.
- Implemented Google Maps-powered map views with interactive map markers to improve user navigation efficiency.
- Deployed a fully functional property search application to a live server environment (InMotion Hosting with cPanel, running Linux, Apache/Nginx, PHP, and MySQL).

Youphoria

Baltimore, Maryland

NLP Research Project

Data Director March 2026 ~ Present

- Researched CNN-based text classification for moderating user-generated posts on a wellness platform with fitness tracking and community forum features.
- Studied how CNN filters identify local phrase patterns related to profanity, harassment, hate speech, and sexually explicit content in forum discussions.
- Proposed a lightweight content moderation pipeline combining bad-word screening with CNN-based classification to detect harmful posts while minimizing false positives.

Other Professional and LEADERSHIP EXPERIENCE

Siebel School of Computing and Data Science, University of Illinois

Champaign, Illinois

Course Assistant February 2025 ~ May 2025

- Designed and delivered targeted programming tutorials to 50+ students every Monday for 2 hours.
- Provided practical feedback and solutions to improve problem-solving abilities on assignments and course projects.

College of Liberal Art & Science, University of Illinois

Champaign, Illinois

LAS100 Intern June 2025 ~ October 2025

- Organize and Implement Activities: Work with LAS staff to plan and execute workshops, informational sessions.
- Assist instructors by managing attendance, distributing materials, and coordinating course-related communications.
- Lead small group discussions and activities to build a sense of community among LAS 100 students.

SKILLS & INTERESTS

Programming: TypeScript, JavaScript, SQL, Java, Python, C++

Web & Backend: React, REST APIs, Relational Databases, Git, Linux

Data & ML: Data Modeling, API Design, Pagination, Matplotlib, Seaborn, TensorFlow, scikit-learn, Statsmodels.

Language: English (Proficient), Mandarin (Native)
